

Education

Computer Engineering

Bachelor's degree program

Major Project: Blockchain based Vaccine Certificate

Minor Project: Vehicle Tracking and Management System

Final Grade: 85.22% (Ranked **1st** in Pulchowk Campus and **4th** in IOE, TU)

Tribhuvan University, Nepal

Nov 2017 – March 2022

Work Experience

Logpoint Nepal Pvt. Ltd.

Solutions Engineer

May 2023 – Present

Lalitpur, Nepal

- Proficiently handled more than 500 escalated and critical customer cases, ensuring prompt issue resolution.
- Developed scripts to monitor disk health, manage memory, and track network performance, resulting in a 50% reduction in time spent on debugging sessions.
- Detected significant memory leaks in the product through code reviews and analyzing heap and thread dumps. Additionally, proposed alternative GC algorithm(Shenandoah and ZGC) for Java and optimized native memory allocator(jemalloc) for Python and Java services which increased the throughput of the services by 25%.
- Worked with a cloud integration team to design and develop a product focused on cloud integration. Additionally, played a key role in the development of a product based on Wazuh, an open-source SIEM platform.

Logpoint Nepal Pvt. Ltd.

Associate Solutions Engineer

Jan 2022 – April 2023

Lalitpur, Nepal

- Identified and resolved software bugs, contributing to the overall stability and performance of the software.
- Developed monitoring scripts in Go, Python, and Bash, enhancing the system's performance and ensuring efficient operations.
- Conducted code reviews for plugins and tools, providing optimal solutions to improve code quality and efficiency.
- Collaborated closely with customers to address and resolve issues related to disk management, networking, database operations, and web server configurations.

Sireto Technology Pvt. Ltd.

Software Developer Intern

Aug 2021 – Dec 2021

Lalitpur, Nepal

- Collaborated with a team of developers to design and implement blockchain solutions using Plutus framework.
- Contributed to the development of decentralized applications and smart contracts.

Fusemachines Nepal Pvt. Ltd.

Data Engineer Intern

May 2021 – Aug 2021

Kathmandu, Nepal

- Developed efficient data pipelines and performed data analysis using Python, SQL, and MongoDB.
- Worked in different stacks such as Docker, Hadoop, MongoDB, PostgreSQL, Apache Spark, Databricks, and Apache Kafka.
- Gained practical experience in working with large datasets and data manipulation.

Academic Projects

Blockchain Based Vaccine Certificate

2022

Major Project

- Collaborated with team members to design and implement blockchain based vaccination certificate using EthereumJS, NextJS and ExpressJS.

Vehicle Tracking And Management System

2021

Minor Project

- Real time vehicle tracking android based application using GPS and web based vehicle management system using React Native, React, NodeJS and MongoDB.

Disaster Database

2021

Database Project

- A web application implemented in React, Go, and MySQL for entering and retrieving global disaster records.

Collaborative Whiteboard

2020

OOP Project

- A C++ project using SFML allowing users to draw together over a shared network in real-time.

Teaching Experience

Security Operations Fundamental Lab

Present

Lab Instructor

- Working as a lab instructor for "Security Fundamental Operations" course jointly offered by LogPoint and IOE.

Advanced C Workshop - IT Club Pulchowk

2021

Instructor - 7 days

- Facilitated advanced concepts in C programming languages for juniors.

Software Fellowship - LOCUS

2021

Instructor, Organizer - 14 days

- Instructed on the basics of Python and Flask framework.

CIT - LOCUS

2021

Instructor, Organizer - 4 days

- Taught high schools students from remote villages about technology with a purpose of motivating them towards technology and technical education

Affiliations

LOCUS

2021

Outreach Manager

- Successfully organized and managed a diverse range of events, including Software Fellowship, Technical Talk Shows, Children in Technology, Hack-a-Week, and Capture-the-Flag.
- Played a crucial role in media outreach and fundraising activities for LOCUS 2021.

Technical skills

Programming Languages Devops tools

Go, Python, Javascript, C, C++, Java
Linux System, Docker, Kubernetes, AWS Cloud

SCHOLARSHIPS AND AWARDS

NCELL Excellence Award Winner (2020,2021,2022)	Recipient of the NCELL Excellence Award for three consecutive years, securing first position in the Computer Engineering batch during the second, third, and fourth years of study.
Mahatma Gandhi Scholarship(2016,2017)	Recipient of Mahatma Gandhi Scholarship from Indian Embassy for securing good scores in high school.

Certifications

AWS Certified Solutions Architect - Associate	Sep 2023	Validation Number: D1H9287C0B441ZCB
ISC2 Certified in Cybersecurity	Feb 2024	Certification Number: 1572493
